

# Driving Digital Health through Infrastructure, Integration and Implementation

## Key Benefits of Xealth for Health Systems

### Increase Patient Activations

Patients are more likely to engage in solutions prescribed by their provider

### Unburden Provider Teams

Providers can order your solution directly from the EHR workflow

### Unburden IT Teams

Scale programs without overloading an already busy health system IT team

### One Centralized Integration

Easy access to all digital assets and programs in one location

## Supported Solutions

### Patient Education

Videos, Documents, Questionnaires

### Mobile Applications

Desktop, Apple Store, Google Play

### RPM & Digital Diagnostics

Connected Devices, Remote Assessments and Monitoring

### Non-Clinical Services

Product Delivery, Transportation, Meal Delivery

of patients across all initiatives and customers

# Xealth – A Platform for Digital Health

## Order digital content

Choose the best path to enroll patients – manual, automated or asynchronous to encounter events

## Monitor patient activity

Display patient-level dashboards and consoles, making it easy for clinicians to see what's happening with their patient

## Deliver digital content

Omnichannel communication options are available at the time of order or as a reminder: email, SMS and patient portal delivery

## Escalate when needed

Using our API, you can writeback discrete values, trigger decision support, and communicate changes to the care team

## Xealth Sandbox

### Coming soon! Join the Xealth Community

Develop and validate endpoints in a standalone environment. This turnkey approach enables a quick and frictionless deployment at one or multiple health systems.

## Security & Technical Specifications

### Event based API with standard authentication

- OAuth2
- Bearer Token
- JWT / JWKS

### SOC2 Certified

### JSON

### OpenAPI Specification 3.1.X

## Network of Clients and Investors

The Xealth client and investor network is charting the course for digital health, sharing, and creating best practices as they build their digital ecosystems.

## Team Xealth

Xealth was founded by a team of consumer technology experts who had successful careers in cell phone, website, and interactive technology. In 2016, they joined Providence St. Joseph Health and saw an opportunity to apply their knowledge of digital technology to better connect doctors and patients using everyday tools – for clinicians, the EHRs, for consumers, their smartphones and computers. In 2017, Xealth was spun out, adding health care experts and engineers. The team now comprises more than 60 members, including clinical informaticists, health IT record specialists, and health care business professionals.
